

CORONA

Approved For Release 2005/04/22 : CIA-RDP85B00803R000100030003-8

66-R-638 8.MFR's

25X1

Exec. Dir MFR on PFIAB Mtg.

Dr. Charyk showed a chart on scheduling of satellites. Mention the plan for a solid fuel booster on the M version of COR and Lanyard, which scheduled for Feb. and programmed at a five foot resolution. He noted the plan to have a double capsule on COR so that the basic vehicle could be used for two missions with two recoveries. Gen. Doolittle questioned whether it was realistic to use the solid fuel booster on the first Lanyard mission. Charyk noted that it would have been used previously on the M version of COR and that the launch was the most expensive part of the operation so that this was the economical method to use. Planned to launch a new weather satellite each time the previous one went out of operation.

25X1

Dr. Charyk reported on an Itek proposal on cameras for 120" or 150" focal length. Board expressed some skepticism as to feasibility of this project.

NRO review(s) completed.
